‘Always do your best. What you plant now, you will harvest later.’

‘We work hard to ensure that students leave our school as well-rounded young adults who follow in a proud tradition of students before them’

The marks of success: Winners have an ‘edge’ over others. The school believes in providing that ‘edge’ by polishing the rough edges and preparing strong contenders through numerous special classes and access to a remarkable repository at the click of a mouse.

In these few years, our students have gained admissions to universities in the USA, UK, Canada, Germany and many more...

Our school is affiliated to CBSE. The CBSE syllabus gives us an edge in competitive examinations as most of them are mapped to the CBSE curriculum. My school gives me a world of opportunities.

The Fresh Approach

Securing a seat at a college of their choice is a critical milestone for students on their academic journey. To that end, the Common University Entrance Test (CUET) has established itself as a game-changer in India's higher-education landscape, revitalising the system and streamlining the process for students across the country. The CUET exam today stands as a vital gateway to higher education for millions of students, and the school offers them a chance to turn their dreams into reality.

- Providing the students adequate training, guidance and support -best suited according to their ability.
- Regular online tests to expose students to these exams.

The National Education Policy (NEP) of India has brought a refreshing change to higher education with its flexible approach. The students now have more choices and options when it comes to what they want to study and can now choose any subject from any stream.

The school offers a variety of subject combinations and the flexibility to explore different fields of interest, even if they have a main subject they're studying.

I love to play. My teacher helps me all the time. Sometimes I am naughty, but she never scolds me. I love to go to school everyday

PRE-PRIMARY: Learning time.Fun time.

Our early childhood school works with six key skills to build a strong foundation for future success. Language development, concept formation, socio-emotional skills along with fine and gross motor development take place simultaneously and smoothly through exploration, interrogation and eventually self-discovery dawns.

PRIMARY: When your child watches and emulates

At the Primary School level, we encourage the development of intellectual, social, and emotional skills of our students. The teachers encourage inquiry and exploration, and develop children's competence in various skills - reading, writing, listening, speaking, problem-solving, observation, measurement and use information and communications technology to make classes interesting.

I love to study. And I love to ask. Teacher is so happy when I ask her questions to clear my doubts.

iPad Lab is my favourite place in school.
Here I draw, solve puzzles and learn new
things about places and things. I love
drawing on the iPad. I drew this.
Do you like it?

I am learning coding.
My uncle works at a big software
company. He tells me that one should
start early. I study Maths, Science,
History and Geography too in school.
But the Computer Lab is where
I enjoy the most. Of course,
when I grow up, I will be an
IT Engineer.

iPAD & COMPUTER LABS: In step with the times

At DPS Durgapur, we think that a child's technological development should start as early as pre-primary. Spread over 5 acres, the campus of Delhi Public School, Durgapur, with its grand Victorian structure, is spacious, purpose-built, safe and highly conducive to learning.

I go to school to study and play.
Apart from playing games with
my friends, I love to spend time
in the school library reading and
choosing books.

There is no better way to learn the various aspects of science than discovering them hands-on. At our school Labs, we are encouraged to do experiments that are quite challenging, under the supervision of our teachers. It helps in understanding the finer points and remembering them better.

The Labs and hands-on activities have helped me to learn the subject matter and reinforce my understanding of complex scientific topics. My lab periods are exciting and I wait for them!

SCIENCE LABS: Learning practically

Students at Delhi Public School Durgapur are well-prepared for all the challenges that lie outside the school's walls, thanks to the comprehensive and experiential learning style that balances information, comprehension, and skills. A child's second home is made comfortable by a combination of different infrastructural elements, which include:

teacher in school is a
great inspiration. He
